Art Unit: 1617

Continuation of No. 10:

Examiner maintains the position that the difference between the claimed invention and comparison examples do not amount to unexpected or surprising results. Declarant refers to the differences of the present invention and Examples 2 or 3 in foam volume, size of the bubbles, density of the foam, and rinsing properties. However, there is not difference between the invention and Example 2 in foam volume and size of the bubbles, density of the foam; and between the invention and Example 3. Furthermore, it is still unclear what these numbers in the table represent; while applicants assert that spec. p.17-18 explains how the data was measured, the only measurement with scientific and objective unit is the turbidity.

Continuation of No. 11:

Applicants' remark that smaller bubble size, higher foam density, and improved rinsibility provide more desirable physical properties for cleansing composition, is noted. In response, the fact that applicant as recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). In this case, the use of the applicants' cationic polymers in personal cleansing art is well known in the art. Examiner takes the position that the observed properties of the cationic polymers used in the present invention would have been obvious to a skilled artisan.

Art Unit: 1617

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gina C. Yu whose telephone number is 571-272-0635.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
